■ Alphawise: High-Impact 3-Minute Pitch Video Script

The Winning Formula: The Hook, The Problem, The Solution, The Live Demo & The Vision

Target Duration: 2:45 – 3:00 Minutes | **Format:** Camera-to-Screen Hybrid | **Tone:** Visionary, High Energy, Confident

■ THE PITCH FORMULA (3 MINUTES TO WIN THE ROOM)

- **Act 1: The Problem (0:00 – 0:40):** Millions of investors believe they are diversified because they own 10 stocks, but 80% are correlated tech bets. When storms hit, they lose 30%+.
- **Act 2: The Solution (0:40 – 1:10):** Alphawise: institutional quantitative optimization + spectral factor risk decomposition + real-time AI CIO intelligence.
- **Act 3: High-Octane Live Demo (1:10 – 2:15):** 1-Click Tangency Solver, Effective Bets (N_eff), COVID Crisis Stress-Test (+8.4% cushion), and the viral 'Roast My Portfolio'.
- **Act 4: Market Opportunity & The Vision (2:15 – 3:00):** Democratizing BlackRock-grade quantitative intelligence for wealth managers and modern investors.

Act 1: The Hook & The Multi-Billion Dollar Blindspot (0:00 – 0:40)

TIMING / ACT	CAMERA & SCREEN ACTION	VERBATIM SPOKEN SCRIPT (WORD FOR WORD)
0:00 - 0:20 **The Hook** **(Face to Camera)**	• **Presenter on camera.** • Lean in slightly, confident posture, strong eye contact. • High energy tone.	"Did you know that over **70% of retail investors and wealth managers** genuinely believe they have a diversified portfolio simply because they own 10 different stocks? Here's the brutal reality: if 7 of those stocks are Nvidia, Microsoft, Apple, and semiconductor ETFs, they don't have 10 bets. **They have 1 giant bet on the exact same risk factor.**"
0:20 - 0:40 **The Blindspot** **(Camera to Screen)**	• Quick cut to screen recording of **Alphawise Terminal** (`alphawise-frontend.vercel.app`). • Pan across the dark financial interface.	"When a liquidity crunch or interest rate spike hits, their portfolio collapses by 30% or more—and they have no idea why. The multi-billion-dollar hedge funds on Wall Street have access to quantitative risk decomposition and convex optimization solvers. Everyday investors and modern advisors are left with simplistic broker charts. **Until today.**"

Act 2: The Solution — Meet Alphawise (0:40 – 1:10)

TIMING / ACT	CAMERA & SCREEN ACTION	VERBATIM SPOKEN SCRIPT (WORD FOR WORD)
0:40 - 1:10 **The Value Prop** **(Split Screen / Screen)**	• Hover cursor over the glowing top logo: Alphawise TERMINAL v2.5. • Point to the green **Live Engine Status Heartbeat**. • Toggle ■ **Theme Switcher** once to showcase interface polish.	"Meet **Alphawise**: an institutional-grade quantitative portfolio optimization and risk intelligence platform. Alphawise bridges rigorous mathematical finance—Modern Portfolio Theory, Ledoit-Wolf shrinkage, spectral factor decomposition, and historical macro crisis stress-testing—with ultra-fast AI fiduciary diagnostics powered by Groq Llama 3.3 70B. It turns complex institutional mathematics into intuitive, broker-executable portfolio intelligence in under a second. Let's see it in action!"

Act 3: High-Octane Live Product Demo (1:10 – 2:15)

TIMING / ACT	CAMERA & SCREEN ACTION	VERBATIM SPOKEN SCRIPT (WORD FOR WORD)
1:10 - 1:30 1-Click Optimization & Sharpe Gain	• Screen: Click preset ■ Tech Megacaps. • Add +GLD (Gold) and hit ■■ Equal Weight. • **CLICK**: ■ Run Institutional Optimization. • Circle **Optimal Sharpe Ratio Card** (+Δ delta).	"Watch how fast this works. In the left panel, we load a concentrated Tech basket and inject Gold as an orthogonal hedge. We hit **Run Institutional Optimization**. In under 800 milliseconds, our SciPy and CVXPY quadratic solvers calculate the tangency portfolio along the Efficient Frontier. Instantly, we see our **Optimal Sharpe Ratio surge**—maximizing expected return per unit of annualized volatility."
1:30 - 1:50 Spectral Factor Bets (N_{eff})	• Move cursor to **Metric Card 4: Effective Bets (N_{eff})**. • Hover over the INFO ■ badge. • Quick glance at **Efficient Frontier** tab.	"Now look at our signature feature: **Effective Number of Bets (N_{eff})**. Most platforms say we have 6 holdings. Alphawise calculates the eigenvalue spectral decomposition of the correlation matrix and computes Shannon entropy across orthogonal risk factors. It proves our 6 assets only represent **2.8 true independent bets**—giving investors unvarnished mathematical truth about their real exposure."
1:50 - 2:15 Stress Test & Dual AI Persona	• Click Tab 2: ■ Macro Crisis Stress-Test. • Point to **Downside Cushion (+8.4%)**. • Scroll to AI Hub and click ■■ Roast My Portfolio. • Read the bold headline.	"Next: **Historical Stress Testing**. We simulate our exact holdings through real historical crashes like 2020 COVID and 2008 Lehman. The optimized allocation provides an **8.4% downside capital cushion** and cuts recovery time in half. And look at the **AI Diagnostic Hub**: advisors can read an **Institutional CIO Fiduciary Memo**, or toggle to **'Roast My Portfolio'** for a viral, FinTwit-style critique that exposes retail biases in seconds!"

Act 4: The Market Opportunity, Execution & The Vision (2:15 – 3:00)

TIMING / ACT	CAMERA & SCREEN ACTION	VERBATIM SPOKEN SCRIPT (WORD FOR WORD)
2:15 - 2:40 Execution & Copilot (Screen)	• Scroll down to **Rebalance Ticket**. • Point to ■ Copy Trade Ticket. • Click ■ Ask Copilot in bottom right. • Point to ■ Export Tear Sheet in header.	"Alphawise doesn't just analyze—it executes. Our **Rebalancing Ticket** generates broker-ready trade deltas (Δw). Our real-time **AI Copilot** answers any query about factor risk, and **Export Tear Sheet** generates a BlackRock-style 1-page PDF report with a single click."
2:40 - 3:00 Closing Vision (Cut to Camera)	• **Cut back to presenter on camera.** • Smile, confident body language, impactful closing cadence.	"There are over **300,000 independent financial advisors and tens of millions of active investors** hungry for institutional-grade portfolio intelligence without five-figure terminal fees. Alphawise is the bridge between quantitative rigor and everyday accessibility. We're transforming how the world optimizes, manages, and protects wealth. I'm [Your Name], and this is **Alphawise**. Thank you!"

■ Pro Tips for Delivering an Award-Winning Pitch Video

1. Hook with Urgency: Deliver the first 20 seconds with high conviction. Don't start with 'Hi my name is...', start directly with the problem: 'Did you know that over 70% of investors...'.
2. Video Transitions: Start on camera (0:00–0:20), cut cleanly to screen recording (0:20–2:35), and cut back to camera for the final 25 seconds (2:35–3:00). This keeps judges 100% engaged.
3. Pacing & Energy: Keep energy upbeat. Speak clearly, don't rush, and let the live terminal UI shine.
4. Video Description: In your submission / YouTube video description, include the live link: https://alphawise-frontend.vercel.app and GitHub repo link.
